

JIGYASA

PROBLEM STATEMENT

The non-profit organization, dedicated to educating rural children, currently operates using manual and disconnected processes. This lack of a centralized digital system leads to inefficiencies in managing student data, tracking academic progress, coordinating volunteers, and distributing educational resources. As the organization grows, the absence of a streamlined platform hinders scalability, transparency, and impact measurement.

"PROPOSED SOLUTION

01

Study Support Materials

It includes curated content like videos and quizzes tailored to each grade level..

02

Unified Management Portal

A centralized platform for admins and volunteers to access tasks, assessments, and updates, streamlining communication and boosting efficiency.

03

Connectivity platform

A digital bridge that connects volunteers, admins, and schools to ensure seamless communication and coordination.

" UNIQUE SELLING PROPOSITION

01

Teaching Companion Tool

An educational chatbot for volunteers to access extra teaching material, clarify out-of-syllabus doubts, and receive guidance on supporting students beyond the provided resources. It acts as an on-demand teaching companion.

02

Volunteer Engagement Bridge

A dedicated space for real-time communication, task updates, , enabling smooth coordination between volunteers and the NGO.

03

Volunteer Scheduling System

A volunteer scheduling system that organizes sessions by volunteer ID, school, subject, grade, date, and time. It automates calendar management and sends timely email reminders to volunteers, ensuring smooth coordination and attendance.

"SYSTEM ARCHITECTURE

"FUTURE SCOPE

Data-driven coordinator view >> A dedicated program coordinator interface will enable data analysis of student assessments and live attendance tracking. This will help monitor academic performance, identify learning gaps, and ensure accountability in real-time.

Student progress dashboard >> Future development will focus on individual student assessment, allowing detailed tracking of each child's progress, strengths, and learning gaps. This enables personalized support, data-driven interventions, and improved educational outcomes.

Syllabus Tracking>> The platform will include dynamic syllabus tracking to monitor coverage across subjects and grades in real-time. It will allow easy updates and alignments with educational standards

Welcome, Volunteer! 🙌
